

Unlock Smarter Fleet Management by leveraging mobility data

Driver Profiling

Get a full picture of driving patterns including speed, harsh braking, idling and other behaviours. Find out where driver performance is exceeding expectations or where additional coaching is needed.

Predictive Maintenance

Predictive maintenance is highly cost-effective, saving up to 40% over reactive maintenance. Leverage big data to monitor vehicle health and prevent vehicle issues before they become a reality.

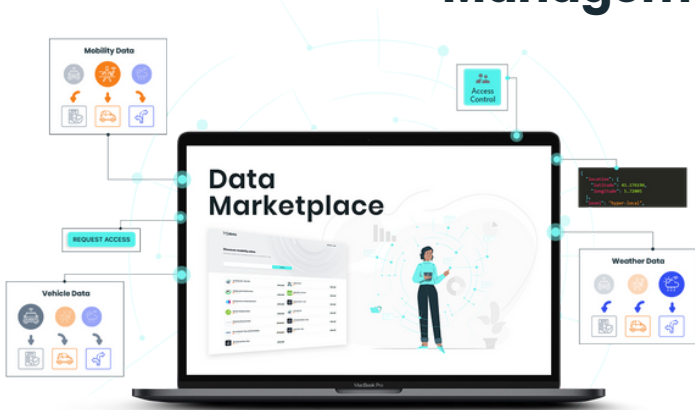

Route Optimisation

Increase productivity and reduce fleets costs by analysing location data. Detect the most cost-effective route for a given destination point.

Control your data access with Mobito's Data Exchange Management platform

Outsourced data procurement

End-to-end data access control

Data Catalogue

Potholes

Dangerous segments
