

## Unlock smarter Road Maintenance by accessing vehicle & mobility data

### Smart analysis: Before - After

Understand the effect of road infrastructure and traffic management changes by observing driving changes in specific road segments (e.g. avg. speed, harsh driving, accidents, traffic calming). Gain insights in weeks vs years.

### Infrastructure Maintenance

Identify potholes, missing road signs and assess road lines quality through sensor data from connected vehicles data.

### Winter Maintenance

Monitor road surfaces in real time and prevent crashes, avoid unnecessary call outs and reduce salt usage with specialized road condition data.

## Control your data access with Mobito's Data Exchange Management platform

Outsourced data procurement

End-to-end data access control

### Data Catalogue

Potholes

Dangerous segments

Traffic insights

Road weather

## Ready to get started?

Schedule a call with our team to find out more about the mobility data and data exchange capabilities of the Mobito platform.
